To determine compartment sizes:

Sizes are in Length x Width x Total height

Take the width of the cage and divide it by how many compartments it has across – Example: The 72 x 24 x 54 – 9 Compartment has 24" x 24" compartments ($72/3 = 24$)

6 compartment units – 2 across, 3 high

9 compartment units – 3 across, 3 high

12 compartment units – 4 across, 3 high

16-compartment unit – 4 across, 4 high

54" high units – Each compartment is 14" high interior
